## **DETAILED ACTION**

## Claim Rejections 35 U.S.C. 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 1-32 rejected under 35 U.S.C. 103(a) as being unpatentable over Adan et al. (USPN 6373047) in view of (USPN 6396477).

Regarding claims 1, 6, and 28, Adan teaches an input device system including a processing unit (21), a hard disk drive (27), a magnetic disk drive (28) and optical disk drive along with associated computer readable media storing computer readable instructions. Adan also teaches that when mouse (42) is moved over high-resolution zone (144), a control component determines that the mouse is over a zone having a predetermined pattern. See Fig 1 and Fig 6. However, Adan does not teach an illumination member of an input device that changes states. Katrinecz on the other hand teaches a data entry device including a mouse, which has a feature of illumination with various characteristics. See col. 1, lines 10-15 and 55-57.

Therefore, it would have been obvious to one skilled in the art at the time the invention was made to modify Adan's input device system to include Katrinecz's illuminating feature. One would have been motivated in view of the suggestion in Katrinecz that the illuminating feature is functionally equivalent to the desired illuminating member of the input device. The use of an illuminating feature in an input device helps control visual attributes and functionalities as taught by Katrinecz.

Application/Control Number: 09/699,517

Art Unit: 2674

Regarding claim 2, Adan teaches the use of an input device for the purpose of providing specialized messages to the computer. See Fig 11.

Regarding claims 3-5, 21-23 and 30-32, Katrinecz teaches the use of illumination with various colors and intensities. See col. 2, lines 14-18 and 19-31.

Regarding claims 7 and 27, Adan teaches a "mouse message hook" that executes and returns a value to the operating system (35). See col. 7, lines 15-20.

Regarding claims 8-15, 25-26 and 29, Adan's Fig 10B (192, 196).

Regarding claims 16-18, Adan teaches a control component (124) with respect to a predetermined time out period and the velocity of the mouse over the surface (116). See col. 9, lines 28-44.

Regarding claims 19-20, Adan teaches the use of the input deice with respect to game applications utilize the functionalities of the device. See Fig 3.

Regarding claim 24, Adan teaches the input device system for providing position information based on the movement of the input device. See col. 1, lines 24-28.

Application/Control Number: 09/699,517

Art Unit: 2674

## Conclusion

2. The prior art made of record and not relied upon is considered to applicant's disclosure.

Art Unit: 2674

3. Any inquiry concerning this communication or earlier communication from the examiner

should be directed to Abbas Abdulselam whose telephone number is (703) 305-8591. The

examiner can normally be reached on Monday through Friday (9:00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Richard Hjerpe**, can be reached at (703) 305-4709.

Any response to this action should be mailed to:

Commissioner of patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9314

Hand delivered responses should be brought to Crustal Park II, Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology center 2600 customer Service office whose telephone number is (703) 306-0377.
